

# HCL Detox Therapy

## What Is the HCL Detox Program?

The HCL Detox Program is a highly effective, inexpensive procedure using beet-derived HCL (hydrochloric acid) taken with potassium-rich synergists for daily oral consumption.

It was revealed by medical pioneers in the 1930's. They discovered how outstanding the results were for cleansing all the body's organs and glands. In researching the benefits of HCL, they found that taking HCL alone (orally) often had a poor response. However, when the HCL was combined with specific synergistic activators, they discovered that an amazing whole-body cleansing response was initiated, helping to ignite the immune system's efficiency of response and integrity, even in their worst cases.

They found extensive benefits for many types of concerns, which we now know is due to the process of deacetylation, suppressing undesirable genes and reactivating good genes, which can provide dramatic help for the kidneys, lungs, pancreas, liver, skin, uterus, prostate, bladder, and much, much, more.

*“Whether you have serious, chronic immune concerns or just want a much higher level of great health, I am an ardent supporter of the HCL Detox Kit. Just as the insightful medical doctors wrote about in the 1930's, I also have found that natural-source HCL (only when combined with its potassium complex activator) acts as an amazing ‘natural sterilizer’ of the body's blood and GI tract- not harming any of your own beneficial flora but targeting and relentlessly cleansing elusive microinvaders- so typically at the core of stubborn health issues. That's why I routinely use the HCL Detox Kit in my practice. Welcome to the HCL Detox Kit- and its amazing health benefits. Try it- you'll like it- no, I think you'll love it!” – Dr. Bob Marshall, PhD, CCN, DACBN.*

## More about the Benefits of HCL

In the 1930s, medical pioneers discovered that a dilute, natural-source HCL solution, when specifically combined with potassium and other mineral salts was an incredibly efficient media to eliminate even serious, longstanding infections. It was safe, efficient and easy to use -- taken orally several times daily. So outstanding were the results that numerous medical researchers found it uncompromisingly beneficial for every condition they used it for -- from tonsillitis to malaria to cancerous tumors.

Without question, they realized that this HCL solution could break down the impervious polysaccharide sac surrounding virulent disease organisms such as tuberculosis -- with almost unfailing resolution of the condition. Today, we know that over 99% of all infections in the body exist in these sacs, which we now call biofilms.

In our current times of many chronically ill people, worldwide research now links most major degenerative diseases to underlying, hidden infections. Such a simple, efficient, safe and highly effective therapy to eliminate biofilms, as they had used in the past, would greatly benefit those who suffer from chronic illness today.

For HCL Detox Therapy, natural-source betaine HCL (hydrochloride) is combined with potassium-rich, natural substrates that together create a unique, highly ionized complex that is fully capable of detoxifying and bursting the biofilm sacs (where infectious organisms hide and have become resistant to the immune system). This allows the immune system (previously locked out) to easily enter the biofilms and successfully attack and kill micro-organisms. Now, just as the medical researchers were able to do over half a century ago, we have an effective method for clearing biofilms and the degenerative, infection-driven states they cause.

**Ingredients:** Quantum Betaine HCL and Quantum HCL Activator

**Caution:** If you have experienced kidney failure or have a high white cell count (as in leukemia, etc.), start slowly with HCL Detox Kit, using only one Betaine HCL and Activator per day immediately following the main meal (lunch).

### **Directions for HCL Detox Therapy**

The Betaine HCL and HCL Activator are to be taken after each meal 3 times daily. The following are recommendations based on age and body weight:

- Individuals between ages 25 and 50 and who weigh 100 – 150 lbs. take 2 Vcaps of Betaine HCL and 1 Vcap of HCL Activator with at least ¼ cup of water.
- For those between ages 25 and 50 and who weigh 151 – 200 lbs. take 3 to 4 Vcaps of Betaine HCL and 2 Vcaps of HCL Activator with ¼ cup of water. For those still in this age bracket and weigh over 200 lbs. add 1 to 2 Vcaps of each product for each additional 50 lbs.
- For individuals over age 50 and who weigh between 100 – 150 lbs. take 3 to 4 Vcaps of Betaine HCL and 3 to 4 Vcaps of HCL Activator. For each additional 50 lbs. add 1 Vcap of each.
- For those under age 25 (especially young children and adolescents), be sure to consume adequate amounts of good quality sea salt ([Premier Pink Salt](#)), at least ½ to 1 teaspoon daily added to food or water. The salt provides the raw material from which hydrochloric acid may be made. For those under age 25, the amount of HCL recommended depends on body size, as well as the amount of sea salt consumed daily, exercise levels and amount of perspiration lost daily.

### **Intensive Cellular Cleansing**

After several weeks of using the HCL Detox Kit, and you have experienced no major cleansing reactions, you may increase the level of detoxification. Follow these instructions for a more intensified program. If you begin to experience burning in the stomach or increased fatigue, go back to the original routine based on age and body weight:

Open 1 Vcap of Betaine HCL and 1 Vcap of HCL Activator into ¼ cup of purified water. Swirl briefly until dissolved. Consume immediately (the HCL will lose its potency quickly). Rinse mouth afterward. If you have dental issues you may want to drink it through a straw. Take this 1 time a day after your main meal (you may continue taking the other 2 doses in capsule form after other meals if you choose.) Within a few days, open 2 capsules each of the Betaine HCL and HCL Activator into water and drink. Keep the dose here without taking the other 2 doses for a several days to gauge how you feel. It is fine to keep it here with 2 capsules each opened into water after your main meal once a day, or you may increase to twice a day if no major detox reaction occurs.

**Note:** HCL Detox Therapy tends to detoxify the head and mouth areas first, so if there are congested lymph areas in the head and neck region, then swelling symptoms may occur. In these cases, reduce the HCL doses and consider external detoxification by use of [Castor Packs](#) over the congested areas, then follow with a [Medi Blast™](#).

Also, it is not uncommon when starting the HCL Detox Kit to experience a runny nose. Do not be alarmed as this is a good sign that your body is purging toxic waste.
